NAME				

The graph illustrates the demographic trend of an aging population in the United States. The x-axis represents the year from 1950 to 2020, and the y-axis represents the percentage of the population aged 65 and over, ranging from 0 to 20. The line shows a consistent upward trend, starting at approximately 7% in 1950, rising to about 10% by 1960, and reaching approximately 16% by 2020. There is a small dip in the percentage around 1960, followed by a continued rise.
